Blue Bees

Recovery Non-Profit Org

Organization Description:

Blue Bees Recovery is a nonprofit rehabilitation organization that uses beekeeping as a therapeutic tool to support recovering addicts and their children. Established on World Bee Day in 2022 by siblings Nuren and Melissa Mayer, the organization was inspired by their personal experiences with addiction and their belief in the restorative power of nature. Through hands-on beekeeping activities, participants develop patience, responsibility, mindfulness, and self-discipline while rebuilding confidence and self-worth. Children involved in the program benefit from a safe and supportive environment where they learn teamwork, environmental awareness, and valuable life skills. Supported by partners such as The Honey Company, Brother Bees, and Best Bees Company, Blue Bees Recovery has helped hundreds of individuals and families find stability, healing, and hope for a brighter future.

Reasons for creating the business

I chose to create an organization and named it Blue Bees because beekeeping offers a unique kind of therapy. Working with bees needs patience, care, and mindfulness. These qualities help recovering addicts' discipline and self-worth. For children of addicts, I think beekeeping provides a safe, proper environment where they can learn to be responsible, work in a team, and provide environmental care.

Website Description

The Blue Bees Recovery website serves as an informational and community engagement platform for the organization. It provides visitors with insight into the organization's mission, history, rehabilitation programs, and volunteer opportunities. The website features a clean and professional design that reflects the organization's values of healing, growth, and environmental stewardship through the use of calming blue tones and nature-inspired imagery. Users can learn about the services offered, explore ways to get involved, and contact the organization for further information or support. Overall, the website acts as a digital gateway that connects individuals, families, volunteers, and sponsors with the work and impact of Blue Bees Recovery.

The primary target audience of the Blue Bees Recovery website includes individuals recovering from substance addiction and families seeking alternative rehabilitation and support services. The website also targets parents and guardians looking for programs that can positively impact both themselves and their children. A secondary audience consists of volunteers, sponsors, donors, and community members who are interested in supporting rehabilitation initiatives and environmental conservation efforts.

Website Goals and Objectives

- ✧ **Provide information about Blue Bees Recovery** by educating visitors about the organization's mission, history, values, and the role of beekeeping in rehabilitation.
- ✧ **Promote rehabilitation and family support programs** by clearly presenting the services available to recovering addicts and their children.
- ✧ **Encourage community involvement** by providing opportunities for volunteers, sponsors, and donors to support the organization's initiatives.
- ✧ **Facilitate communication between the organization and the public** through accessible contact information, enquiry forms, and support channels.
- ✧ **Increase awareness of addiction recovery and environmental stewardship** by highlighting how beekeeping can contribute to personal growth, community development, and environmental conservation.

Key Performance Indicators (KPIs)

Impact Measurement (Mission Outcomes)	
Number of participants enrolled in rehabilitation programs	50
Number of participants who completed the program	270 recovered addicts and nearly 200 children
Post-program reintegration rate	96.2%

Self-reported well-being improvement scores	Average 8.9/10 improvement according to surveys before/after program
Community outreach events held	4 (Annual World Bee Day Celebration)

. Operational Efficiency	
Cost per participant served	R5000
Program completion rate vs. dropout rate	Completion 100% vs Dropout 0%
Volunteer hours contributed	1579 hours (66 days)
Training completion rate for staff/volunteers	99.8%

Community Healing Outcomes	
Number of families supported through Blue Bees programs	76 Families
Community satisfaction surveys	Overall, Very Satisfied
Partnerships established with local organizations	The Honey Company, Brother Bees, and Best Bees Company
Stories of transformation shared publicly	189 Stories

Timeline and Milestones:

Week	Progress
Week 1 (9 – 15 March)	Initial client consultation to gather requirements, discuss website goals, identify target audience, and determine the sitemap and content requirements.
Week 2 (16 – 22 March)	Research similar rehabilitation and nonprofit websites, create wireframes, select colour schemes, typography, and develop the overall website design concept.
Week 3 (23 – 29 March)	Create the project folder structure, set up HTML pages, create the navigation menu, and begin development of the Home page.
Week 4 (30 March – 5 April)	Complete the Home page including the hero section, introduction content, navigation, footer, and responsive layout.
Week 5 (6 – 12 April)	Client progress meeting to present the Home page and design direction. Gather feedback and implement requested changes.
Week 6 (13 – 19 April)	Develop the About page including organization history, mission, vision, and team information. Add images and page styling.
Week 7 (20 – 26 April)	Develop the Programs & Services page, including content sections, images, service descriptions, and interactive buttons.

Week 8 (27 April – 3 May)	Develop the Get Involved page with volunteer information, registration forms, and user interaction
Week 9 (4 – 10 May)	Develop the Contact page, including contact details, enquiry form, form validation, and accessibility improvements.
Week 10 (11 – 17 May)	Client review meeting to demonstrate all completed pages, collect feedback, and identify any required changes or additional content.
Week 11 (18 – 24 May)	Refine styling across all pages, optimize images, test navigation links, improve responsiveness for mobile devices, and fix any bugs.
Week 12 (25 – 29 May)	Conduct final testing, validate HTML/CSS, prepare project documentation, publish the website to GitHub.

Website Assets

Webpages and Content

Home Webpage

The Home page serves as the main entry point to the Blue Bees Recovery website and introduces visitors to the organization's mission. It features a clean and welcoming layout with dominant shades of blue, white, and light grey, creating a calm and professional appearance. The page contains a large hero image of a bee farm, a brief introduction to the organization, and cards highlighting volunteering opportunities and available programs. Interactive buttons encourage users to learn more about the organization and its services. This page is important because it creates the first impression of the website and guides visitors to explore the other sections.

About Webpage

The About page provides detailed information about Blue Bees Recovery, its background, and its mission. The page uses a structured layout with large images, informational sections, and blue accents that maintain consistency with the site's overall colour scheme. Content includes the organization's goals, values, and the role that beekeeping plays in supporting rehabilitation and personal growth. Visual elements such as cards and images help present information in an engaging and organized manner. This page is important because it builds trust and helps visitors understand the purpose and impact of the organization.

Contact Webpage

The Contact page allows visitors to communicate directly with the organization and obtain important contact information. It features a simple and user-friendly layout with a contact form, contact details, and clearly organized information blocks. The blue colour scheme and clean design maintain consistency with the rest of the website while ensuring readability. Users can submit enquiries, request information, or seek assistance through the contact form. This page is important because it provides a direct communication channel between the organization and the public.

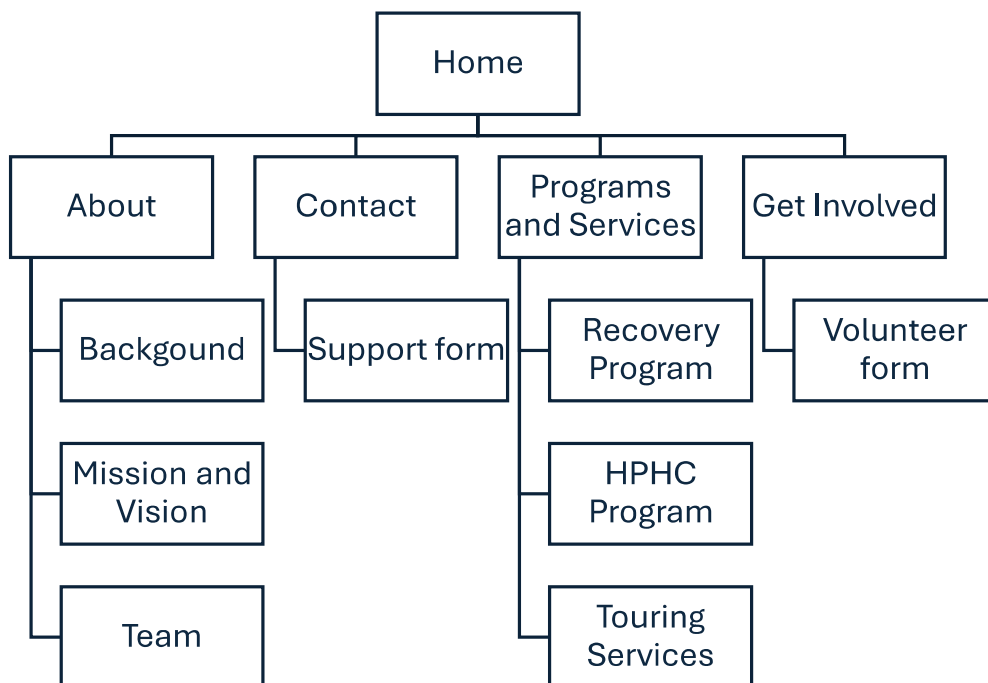

Programs & Services Page

The Programs & Services page explains the various support programs and activities offered by Blue Bees Recovery. Its layout consists of a prominent hero section followed by information cards that present each program in a clear and structured format. The dominant blue and white colour palette reinforces the organization's branding while creating a professional appearance. The content describes rehabilitation programs, family support initiatives, and touring services available through the organization. This page is important because it informs potential participants, volunteers, and stakeholders about the specific services provided by Blue Bees Recovery.

Get Involved Page

The Get Involved page encourages community participation and volunteer engagement within Blue Bees Recovery. It includes a large hero image, informative content sections, and a volunteer registration form designed to collect user information. The page follows the website's blue-and-white theme and uses spacious layouts to create an inviting and accessible experience. Visitors can learn about volunteer opportunities and sign up to contribute to the organization's activities. This page is important because it helps grow community involvement and supports the organization's mission through active participation.
